(I Pet. ii, 24; iii, 18.) The burnt offering shows us Christ perfectly doing the Father's will and giving Himself an offering and a sacrifice to God for a sweet smelling savor (Eph. v. 3); and thus presenting to God as worshipers those whose sina He has put away; the meat offering shows us Jesus Christ in His pure and holy life, doing always those things that please the Father (John viii, 29); and the peace offering brings before us the blessed result of all His toil and death. (Col. i, 30; Rom. v. 1.)

In this first chaper of Leviticus we have the burnt offering as a bullock, a lamb or kid, and a turtle dove or pigeon, but in each and kindness and protection, yet nothing where I can love thee better and serve but sympathy, and prayers and forgive-ness before they are asked for. No bit-ter words when the family Bible goes for into thy hands. We have been together ter words when the family Bible goes for rum, and the pawnbroker's shop gets the last decent dress. Some day, desiring to evoke the story of her sorrows, you say: "Well, how are you getting along now?" and rallying her trembling voice, and quieting her quivering lip, she says:

"Pretty well. I thank you, pretty well." She never will tell you. In the delirium of her last sickness she may tell all the secrets of her lifetime, but she will not tell that. Not until the books of eternity are opened on the thrones of judgment will ever be known what she judgment will ever be known what she to bring doves or pigeons, he might bring a little fine flour, and his sin was atoned for as if he had brought a lamb or two turtle doves or pigeons. (Lev. v, 7-13.) Does not this teach us that, though a person may but very feebly apprehend the meaning of the sacrifice of Christ, yet if with true penitence for sin they look to Jesus as their substitute with ever so feeble faith, forgiveness is theirs as much as if they understood more fulled.

in order to understand this. The sin offering tells us what we are, and points us to Christ who was made sin for us (2 Cor. v, 21), the trespass offering shows what we do as the result of the sin in us, and points to us Christ who bore our sins in His own body on the tree. if they understood more fully!

1. "The Lord called unto Moses and spake unto him out of the tabernacle of the con-gregation." As He dwelt in the Holy of Holles above the mercy sent between the cherubim (Ex. xxv, 23), so He spake from off the mercy sent; not as He had spoken the words of the law from the burning, quaking Mt. Sinai, but from the propitiatory, a type of Christ.

2. "If any man of you bring an offering unto the Lord." No one is compelled to come, but "whosoever will" may come, and "him that cometh" in the appointed way is assured that he will in no way be east out.
3. "A male without blemish." 7. "Fire upon the altar, . . wood in order upon the fire." We think of the story of Isaac in Gen. xxii, and see Isaac carrying the wood, while Abraham carried the fire and the knife; then, a little later, we see the altar built, the wood laid in order, and Isanc bound and laid upon the wood ready to be slain and consumed; but the knife descends not upon Isaac, he is spared, and in his stead the lamb is slain and consumed. God spared not his own Son; he carried the wood of the cross, was nailed to it, and actually died both as a sin offering and a burnt offering. The fire on the brazen altar speaks to us of God's holiness accepting the sacrifice as a sweet savor unto Him (the burnt offering, meat offering and peace offering were sweet savor offerings); but the fire without the camp which consumed the sin offering (Heb. iv, 12) speaks to us of the wrath of God

in equaection with the fire that the words used in the Hebrew in reference to the burning on the altar, and the burning without the camps, are entirely different words; the first

sater the burning as of that which is accursed.

8. "The head and the fat." Even the fat of the sin offering was burned upon the altar as a sweet savor (Lev. iv. 31), teaching us God's appreciation of the excellency of Christ even while suffering for our sins. The head indicates the intellect, fully surrendered to God and appreciated by Him.

A beautiful specimen of the celebrated West India cuculo, or fire beetle, was caught the other night in a door yard in Brooklyn by a little daughter of Mr. Stephen Averill. It is about an inch and a half long, and upon the thorax are two eye like spots, resembling those of an ordinary water beetle. When the insect is placed in the dark these spots shine with a greenish light, strong enough to produce a perceptible fllumination around hem. From the segments of the body underneath the wing covers a similar lumination is produced. The intensity of the light is apparently under the in-sect's control. When undisturbed for a time the light gradually fades out, but it its antenna are touched, or it is otherwise irritated, the oval spots on its back and its body underneath glow with surprising splendor. So bright is the light that the insect flitting among the trees on the evening of its capture was at first mis taken for a toy fire balloon. It may have been brought to Brooklyn in some fruit laden schooner. - New York Sun.

every day. That customer is well known in the social world. She has got the

quinine habit, which will kill her in the

end. There is too much of this quinine

business going on, but we have to keep

up with the times. That lady exhausted

herself in social and charitable visits,

and then began to take a five grain pill

of quinine to brace up on. She did it by the advice of a friend. From five grains

every evening she advanced to fifteen, and soon she will want twenty. She

likes to feel cheerful and look well when

she goes out with her husband, and,

having become a slave to quinine, she

takes it as a stimulant, but her husband is ignorant of the habit. She pays us

ing alcoholic liquor, and we frequently

advise our quinine patients to brace up on whisky or brandy, and let quinine alone."—New York Telegram.

A machine by which the interest on any sum from \$10,00° to \$1, from ten

years to one day, at my rate per cent., may be determined in thirty seconds, by

simply turning a knob, has been patented.

An interest sheet is wound around the rollers inside the machine, which are ro-

chine. Then the smalt metal tablets on

the face and across the center are thrown

up with the point of the pencil, for the time the interest is to be computed. This being done, the required interest is

in plain view. By the use of this ma-

chine all of the mental and three-fourths of the physical labor is dispensed with. It is quicker than books or charts. It is safer than books or charts, because you

cannot see any figures but those you

wish to see. It keeps its own time,-
